Projects

Cryptonite (Decentralized Application) – Website | Github

Jan 2021 – May 2021

- Created a blockchain application for users to send/receive Ethereum, create their own NFTs to sell or buy from others on the website's marketplace
- Designed Ethereum smart contracts using Solidity and Hardhat
- Used asynchronous functions as fetch APIs for NFT transactions and MetaMask account authentication
- Used Etherscan API to fetch all transactions made across the platform and display them on the transaction page
- Stack: ReactJs (frontend), Solidity, Hardhat, Material UI

My Coffee Venture – Website | Github

Jun 2021 – Aug 2021

- Created a CRUD application using MERN stack
- Tested API endpoints using Postman/ ThunderClient
- Deployed

Programming Skills: Python, Javascript/Typescript, HTML/CSS, C/C++, Solidity, NoSQL, Firebase

Technologies: Git, ReactJS, Material UI, NodeJS
